

Mauricio Garcia

Northrop Grumman- Manager Supply Chain 2- Strategic Sourcing and Risk Management
ALPFA Baltimore Chapter- VP of Operations

Mauricio is a results-driven Supply Chain leader with over nine years of progressive experience spanning risk management, strategic sourcing, supply planning, and operational optimization across the aerospace and consumer goods industries.

As a Supply Chain Manager at Northrop Grumman, he drives sector level risk management, fostering supplier partnerships, and leads a team focused on strategic initiatives and supply chain resilience. Previously, Mauricio managed a team at Domino Sugars/ASR Group leading efforts on production planning and demand forecasting.

Mauricio has proudly called Baltimore home for the past nine years, where he enjoys contributing to the city's growth and vibrancy. Since the inception of the ALPFA Baltimore chapter, he has served as committee board member and currently sits on the executive board as the VP of Operations. Passionate about empowering students and helping them develop into future leaders, Mauricio has volunteered at various events collaborating with local universities. His dedication to mentorship and community engagement reflects his belief in building strong, diverse professional networks that thrive together.

Mauricio leads with intention and principle, grounded in a principled leadership mindset, he proactively shapes outcomes, seeks first to understand the people around him, and finds synergy between professional excellence and community impact. He leads with a simple conviction: meaningful change starts small. *"If I can reach one person and spark something in them, that energy doesn't stop, it compounds and creates a ripple effect, that change can multiply and strengthen the community."* This philosophy drives his leadership, mentorship, and dedication to building strong communities that make an impact. Grateful for the opportunities he's received, he strives to pay it forward by building networks that open doors for others.
